

Istiwana Ayesha Project Manager

Contact Information:

Email: business@ammag.tech

Phone: +1 (929) 361-6607

Summary: Highly skilled and accomplished Project Manager with 5 years of experience in leading and delivering successful software projects. Proven expertise in managing a diverse portfolio of projects, including Defi marketplaces, blockchain applications, and decentralized finance solutions. Proficient in project planning, requirement gathering, software implementation, and ensuring projects are completed within budget and schedule. Adept at customizing software solutions and utilizing Github, Gitlab, Azure, and AWS for efficient task management and deployment.

Skills:

- Project Management
- Requirement Gathering
- Software Implementation
- Budget and Schedule Management
- Customization of Software Solutions
- Github and Gitlab
- Azure and AWS

Experience: Project Manager

- Successfully managed and led the development of various projects.
- Collaborated with clients and end-users to gather project requirements and ensure alignment with business objectives.
- Developed comprehensive project plans, including scope, timeline, resource allocation, and budget management.
- Led cross-functional teams to implement software systems, ensuring effective communication and coordination throughout the project lifecycle.
- Customized software solutions to meet specific project needs, enhancing user experience and functionality.

- Ensured projects were delivered on time and within budget, consistently meeting or exceeding client expectations.
- Utilized Github and Gitlab for version control and task management, streamlining the development process.
- Leveraged Azure and AWS for efficient cloud-based deployment and scalability of projects.

Projects:

1. Defi Marketplace: <https://defisports.com/>

Technologies: Ethereum, Smart Contracts, Solidity, Web3.js

Description: A decentralized finance (DeFi) marketplace built on the Ethereum blockchain, allowing users to trade, lend, borrow, and earn interest on various cryptocurrencies.

2. Chainmastery: <https://chainmastery.tech/>

Technologies: Blockchain, Smart Contracts, Node.js

Description: A blockchain-based platform focused on providing educational resources, tutorials, and certification programs related to blockchain technology.

3. Tron Bridge:

Technologies: Tron blockchain, Solidity, TRC-20 Tokens

Description: A bridge protocol enabling the seamless transfer of assets and data between the Tron blockchain and other compatible blockchains.

4. Kryptonomics:

Technologies: Cryptocurrency, Blockchain, Data Analysis

Description: A platform that provides insights, trends, and analytics on various cryptocurrencies and blockchain networks.

5. Aptos Marketplace:

Technologies: Web development stack (HTML, CSS, JavaScript, etc.)

Description: An online marketplace platform where users can buy and sell various goods and services.

6. Unlearned Bot: <https://unlearned.ibt-learning.com>

Technologies: AI, Natural Language Processing, Machine Learning

Description: An AI-powered chatbot designed to assist users in accessing educational resources and answering questions.

7. **Solana Dapp:**

Technologies: Solana Blockchain, Rust, React

Description: A decentralized application (dApp) built on the Solana blockchain, offering fast and scalable transactions.

8. **Fine Original:** <https://fineoriginal.com/>

Technologies: E-commerce Platform, Web Development Stack

Description: An e-commerce website specializing in selling fine art and original creations.

9. **Lava X:** Lavaxlabs.com

Technologies: Mobile App Development (platform-specific technologies)

Description: A mobile app designed to provide real-time volcanic activity updates and geological information.

10. **X Wallet:**

Technologies: Cryptocurrency Wallet Development

Description: A digital wallet app allowing users to store, manage, and transfer various cryptocurrencies securely.

11. **Doxxed Marketplace:**

Technologies: Blockchain, Smart Contracts, Identity Verification

Description: A decentralized marketplace where users can trade and transact while ensuring the privacy and verification of user identities.

12. **Novum Genesis APP:** {Custom Crypto Supported Mobile APP}

Technologies: Mobile App Development (platform-specific technologies)

13. **Qumafy AP:** {An application platform focused on providing information, news, and resources related to a specific industry or domain. }

Technologies: Web Development Stack (HTML, CSS, JavaScript, etc.)

14. **AI Bot:** <https://injaz-bot.ibt-learning.com/>

Technologies: Artificial Intelligence, Machine Learning, Natural Language Processing

Description: An intelligent chatbot powered by AI algorithms, capable of handling user inquiries and providing automated responses.

15. Strategies Scanners:

Technologies: Data Analytics, Algorithms

Description: A software tool that scans financial markets to identify and analyze trading strategies based on predefined criteria.

16. MetaX Swap: <https://metaxswap.finance/>

Technologies: Blockchain, Smart Contracts, Decentralized Exchange

Description: A decentralized exchange (DEX) allowing users to swap or trade various digital assets built on different blockchains.

17. Pangu Airclub:

Technologies: Web Development Stack (HTML, CSS, JavaScript, etc.)

Description: An online platform or club for aviation enthusiasts, providing information and services related to aviation.

18. Funktropolis Marketplace: <https://funktropolismetaverse.com/>

Technologies: Web Development Stack (HTML, CSS, JavaScript, etc.)

Description: An online marketplace featuring unique and funky products from various sellers.

19. Funk Wallet:

Technologies: Cryptocurrency Wallet Development

Description: A digital wallet app designed specifically for holding and managing Funktropolis Marketplace's native tokens or supported cryptocurrencies.

20. OGB Marketplace: <https://marketplace.opengamesbuilders.com/>

Technologies: Web Development Stack (HTML, CSS, JavaScript, etc.)

Description: An online marketplace platform where users can buy and sell various goods and services using OGB tokens.

21. OGB ICO:

Technologies: Blockchain, Smart Contracts, Token Sale Platform

Description: An Initial Coin Offering (ICO) platform to raise funds for the development and launch of the OGB Marketplace project.

22. OGB Metaverse:

Technologies: Virtual Reality, Blockchain, Decentralized Applications (dApps)

Description: A decentralized metaverse project where users can interact, trade, and create in a virtual environment using OGB tokens.

23 .Cesco: <https://cescotech.ca/>

Technologies: Web Development Stack (HTML, CSS, JavaScript, etc.) Description: A web-based platform for managing and coordinating tasks, projects, and team collaboration

24. Dwelling Goldmine:

Technologies: Real Estate Management Platform, Web Development Stack

Description: An online platform for managing real estate properties, rentals, and investments.

Working Hours:

- Available to work 40 hours per week.

Working Location:

- Only interested in remote positions.

Education: Master's Degree in Computer Science
