Muhammad Awais Developer

Contact Information:

Email: business@ammag.tech

Phone: +1 (929) 361-6607

Summary: Dedicated and skilled Tech Developer with 3 years of experience in C#, .NetCore Web API, and SQL Server. Proven track record of delivering successful projects, including DefiMarketPlace, VisualMarketPlace, Visual Nft, Mt4 Bot, Mt5 Bot, Scripts, PyramidCity, Funcktropolis, and DefiSport. Seeking opportunities to leverage expertise in software development to drive innovation and create impactful solutions.

Technical Skills:

- Programming Languages: C#

- Framework: .NetCore

- Web API: .NetCore Web API

- Database: SQL Server

- Version Control: Git

- Project Management: Agile/Scrum

Professional Experience: Tech Developer:

- Developed and maintained applications using C# and .NetCore Web API, contributing to the successful delivery of various projects, including DefiMarketPlace, VisualMarketPlace, VisualNft, Mt4 Bot, Mt5 Bot, Scripts, PyramidCity, Funcktropolis, and DefiSport.

- Collaborated with cross-functional teams to design and implement efficient database structures using SQL Server, ensuring data integrity and optimized performance.

- Participated in code reviews and provided constructive feedback to improve code quality and maintain best practices.

- Assisted in the design and implementation of the combat system and card effects for multiplayer games.

Projects:

1. DefiMarketPlace: https://marketplace.defisports.com/

Developed an innovative decentralized marketplace platform using C# and .NetCore Web API, providing users with seamless access to various financial services.

2. VisualMarketPlace: Contributed to the creation of a visually appealing marketplace application, enhancing the user experience through intuitive design and interactive features.

3. VisualNft: Implemented smart contract functionalities for a non-fungible token platform, enabling secure and transparent ownership of digital assets.

4. Mt4 Bot & Mt5 Bot: Designed and programmed automated trading bots for the MetaTrader 4 and MetaTrader 5 platforms, optimizing trading strategies and enhancing efficiency.

5. Scripts: Developed customized scripts to automate repetitive tasks and streamline workflow processes, improving productivity across different projects.

6. PyramidCity & Funcktropolis: https://funktropolismetaverse.com/

   Played a key role in the development of engaging multiplayer games, utilizing C# and SmartFoxServer SDK to create interactive experiences for users.

7. DefiSport: https://defisports.com/

   Led the development of a decentralized sports betting platform, providing users with secure and transparent betting options using blockchain technology.

Working Hours:

- ○ Available to work 40 hours per week.

Working Location:

Only interested in remote positions.

Education: Bachelor's Degree in Computer Science

Languages:

- English (Fluent)

- Urdu (Native)
