Phone: +1 (929) 361-6607

Summary: Results-driven and detail-oriented Senior SQA Engineer with a strong track record in quality assurance and a focus on creating reliable, error-free software. Skilled in analyzing and optimizing software development processes to meet project deadlines. Currently transitioning towards automation using Selenium with Java to enhance testing efficiency and accuracy.

Technical Skills:

- Smart Contract Testing
- Selenium Java
- Requirement Document
- Manual Testing
- API Testing
- Smoke, Sanity & Regression Testing

Professional Experience: Sr. SQA Engineer/Team Lead

- Lead the quality assurance team in testing Blockchain-based Smart Contract Core using Remix and Hardhat, specializing in testing NFT marketplaces and decentralized applications (DApps).
- Analyzed the entire system and maintained detailed documentation throughout the development process, ensuring products met specific client requirements through rigorous verification and validation processes.
- Created and verified test cases using Selenium IDE and executed them with the automated MetaMask extension to test core marketplace functionality.
- Conducted various types of testing, including regression, smoke, functional, end-to-end, and integration testing, ensuring the quality of the latest software releases.
- Efficiently managed the quality assurance team, ensuring the delivery of high-quality software products and overseeing the entire Software Testing Life Cycle (STLC) using Bug Reporting Life Cycle tools like JIRA.
- Meticulously executed test cases and performed black box testing to verify all possible scenarios related to applications, testing both functional and non-functional requirements.
- Developed beginner-level proficiency in Selenium Java automation, enabling automation of certain testing processes.

Project List:

- NFT LUDO (MarketPlace): {a vibrant marketplace for NFT enthusiasts to discover and trade unique digital assets}
- SWAP: {a revolutionary NFT platform that empowers users to exchange and own a diverse array of digital assets}
- Pangu NFT Market Place: {NFT Marketplace, where artists and collectors unite to showcase and acquire extraordinary NFTs that transcend the boundaries of imagination}
- Game Market Place: {dynamic universe of the Game Marketplace with NFT-based gaming experiences}
- Defi Market Place: {Metaverse & NFT Marketplace}
<https://defisports.com/>
- OGB Market place: {Explore, Collect, and Sell NFTs}
<https://marketplace.opengamesbuilders.com/>
- OGB metaverse: {a virtual universe of interconnected NFT experiences}
- AI bot: {Blockchain AI Crypto Bot}
<https://injaz-bot.ibt-learning.com/>
- MT4 Bot: {an advanced algorithmic tool to optimize your MetaTrader 4 experience}
